ABSTRACT

THESIS TITLE

By

Author Name

Master of Science in Psychology

Abstract goes here

Chapter 1

The First Chapter

1.1 The First Section

We are writing this using LaTeX .

R Markdown is a much simpler language that compiles to LaTeX. We can do all sorts of things without the hassle of LaTeX:

italics and **bold**.

- A thing
- Another thing
- Another another thing

1. First Thing
2. Second thing

“Quotes look better in blocks.” -Someone

Chapter 2

The Second Chapter

2.1 The First Section in the Second Chapter

We can include raw LaTeX:

$$\sum_{i=1}^{\infty} \frac{1}{i} \leq \infty$$

We can also include inline LaTeX like so: $e^{i\pi} = -1$

We can also add code from various programming languages.

2.1.0.1 R

```
x <- rnorm(10, 0, 1)
2+2
```

```
## [1] 4
```

```
plot(x)
```

2.1.0.2 Haskell

```
[x | x <- [1..10], odd x]
```

```
## [1, 3, 5, 7, 9]
```

2.1.0.3 Python

```
x = 'hello ,_python_world!'  
print(x.split('_'))
```

```
## ['hello,', 'python', 'world!']
```
